### Project “Determinants of energy-efficiency Investments”

Dr. Rolf Iten

---

#### **Collaboration - Sounding Board established**

The steering group of the project is complete. It comprises renowned representatives from the science community (from Switzerland, Germany, and UK), national and cantonal administration, industry, services and electricity utilities. The Sounding Board has been set-up with the aim to raise and discuss crucial questions concerning methodological issues and intermediate results at planned milestones and to give recommendations with regard to possible improvements and the further course of action. It is supposed to meet once a year, the first meeting focussing on the discussion of concept, plan and tools for the interaction with the target group (survey, interviews and case studies with large electricity consumers) is scheduled for October 27, 2015.
